

LIST OF CANADIAN AIRCRAFT MODELS

compiled by Stuart Tait

After hearing many inquiries concerning the lack of details and kits for aircraft used by the Canadian Armed Forces, I have listed the following aircraft. The list was assembled from various sources, amongst which Griffin's "Canadian Military Serials", Kostenuk and Griffin's "R.C.A.F. Squadron and Aircraft", various Aircams and various copies of RT are prominent.

There are bound to be some errors in this list as to contents and availability of the kits listed. If there are any errors or additions, please advise the RT Editorial Staff so that the list may be updated at a later date.

It should be noted that I am only including 1/72nd scale aircraft except

in a couple of cases (sorry, large scale fans). It should also be noted that I have included aircraft that are odd-scaled but compatible with the 1/72nd scale aircraft, e.g. the Avro Arrow. Some kits are no longer in production and are unavailable on the general market, or are advertised as future releases.

As a side comment, this listing could provide a basis for a project for IPMS Chapter displays at Air Bases, Open Houses, Legion Halls, Armed Forces Messes as well as Chapter theme contests.

I hope that this list will prove useful.
